

Rodrigo de Souza Castro

Mobile Software Developer

Campo Grande - MS - Brazil [castrodev.com/](#) [@rodrigocastro_o](#)

Mobile technologies and solutions

" Programmer interested in mobile solutions and wearables. I have one startup of finances control. I like to ride bike and listen to podcasts on my idle hours.

Experience

Mobile Software Developer @ Rede Tendência *January 2016 - Current*

Android , Webservices , Oracle SQL Server

I Develop improvements and evolutions to the company apps, with a primary focus on the Sales Management System, which is a work tool to the consultants, enabling them to visit establishments and make sales, everything controlled by the application.

Software Developer @ Jera *June 2014 - October 2015*

Android , Webservices and Websites Ruby on Rails , MySQL Server

Development of systems for Startups, most MVP (minimum viable product). Expertise in developing cab applications, cattle handling, legal correpondents among others.

Substitute Teacher @ UFMS/CPCX *August 2013 - March 2014*

Android , Java

Taught disciplines: Software Engineering I; Systems Development Laboratory Object Oriented - Android Application Development; and Topics in Object Oriented Programming.

Education

Information Systems @ UFMS/CPCX - Coxim - MS - Brazil *2009 - 2013*

C , Java , Android

In the second year of college, along with a newly arrived teacher labor market we opened a software factory, Talent Warehouse. It was where I could feel the skin the reality of what is required out of the academic life of a professional software developer.

Open Source

Javaneiros 2015
